

Mathematical

Reflections

4

In this investigation, you applied the ideas from the first three investigations. The following questions will help you summarize what you have learned.

Think about your answers to these questions. Discuss your ideas with other students and your teacher. Then write a summary of your findings in your notebook.

1. In what ways is the Pythagorean Theorem useful? Give at least two examples.
2. Describe the special properties of a 30-60-90 triangle.
